

ECOTIMBER™
Natural Surface, Healthy Living FLOORING

Hardwood SPC

Flooring

New Growth Opportunity Through Innovation.

High-end flooring is not only eco-friendly and safe but also in line with the current public's pursuit of healthy living.

What is Hardwood SPC Flooring?

Ecotimber hardwood SPC flooring combine the beauty of nature with structural stability. It was born from the idea of creating the same solid look and feel as traditional hardwood floors and is widely available commercially.

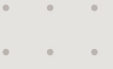

Based on environmental protection and sustainability, we only use precious real wood veneer on the top layer of the floor, so it maintains the authentic appearance and does not waste anything.

Ecotimber provide technical support in the flooring industry has endowed hardwood SPC flooring with super-natural functionalities, enabling residential and commercial applications.

Ecotimber's DNA

Innovation is rooted in Ecotimber's DNA. Ecotimber is keenly aware of the changes in the flooring market and constantly launches new flooring products, always at the forefront of industry development. We expect more partners to have the same ambition to win the present and the future.

Hardwood SPC Flooring

UV Lacquer / UV Oil:

100% waterproof, durable, and keeps its natural wood colour for a long time.

Real Wood:

Choose high-quality natural wood veneers. Natural knots, grain and natural colour variation for the best look.

Mineral Core:

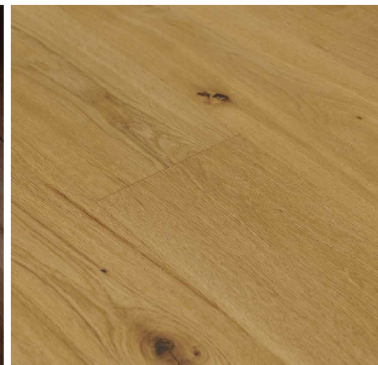

Natural calcium magnesium material better temperature stability. Strength+, durability+ and tenacity+. And it is rich in magnesium oxide, which releases magnesium ions and is beneficial to human health.

Click:

Uses the click locking system to make floor installation easier and tighter.

Underlay:

Mold & Mildew resistant IXPE underlay provides better noise reduction and a softer Eva Form (Ethylene vinyl Acetate) feel underfoot. PE form polyethylene also is available.
